## Lifeline Emergency Response System

---

### *How to Help Your Loved One Accept Lifeline*

We understand that your family's health and safety are important to you, and that it is not always easy to convince a loved one of the need for a Personal Emergency Response Service. Here are some helpful tips that may make this discussion easier.

- ♥ People generally listen to and trust their primary care physicians. Get a prescription or have your family physician call your loved one.
- ♥ Lifeline is affordable. Much more affordable than other avenues of healthcare, such as 24 hour care or nursing home placement.
- ♥ Lifeline offers your entire family peace of mind. Let your loved one know that it would make you feel better if they had Lifeline in their home.
- ♥ Personal Emergency Response can help preserve independence and safety in ones own home.

Thank you for choosing Lifeline.  
For more information, please call (504) 831-8475.
